

LCN Connections Special Edition – August 2013
In Memory of Carol de la Herran

USING HEMI-SYNC® WITH THE HOMELESS IN FRANCE

*by Nelly Jolivet
Outreach Facilitator*

I am not sure of anything regarding TMI now that Carol's vision and energy are used in some other ways, out there and maybe from out there for here in our physical world. There is no single sharing I can write, there are regrets not to have had more time to be around her.

I have regrets and they have been with me since I realized during my one-week facilitator training that I could have gone through GV or LL or... when she was in Spain and she would have been facilitating.

Not meaning she was a better facilitator, meaning she was Carol, a strong believer and healer, an American woman adopting European views from time to time, an inhabitant of the earth.... all this together with being a good businesswoman.

One morning at the Nancy Penn centre, I shared and asked her "would she agree with me using the Hemi-Sync® sound technology with homeless people here in France to restore some balance, esteem and will to have perspective". How she came to say Yes, eyes shining with joy, that day I knew for sure I was at the right place. Business is business and it does not prevent TMI to be being human, gentle, humble, open hearted.
